Hey! 🙋 I build full-stack apps. I'm always learning, enjoy solving tricky problems and have a thing for great user-centric design and experiences.

Experience

Veygo

Senior Full Stack Engineer

July 2025 - Present

I'm currently leading the rebuild of our quote website, from investigating new technologies and architectures to solving key customer and business problems. I've introduced GraphQL for improved flexibility and created a brand new component library using Shadcn and Tailwind to better align with the design team.

As part of the rebuild, I led the development of the first new journey, from discovery to release, enabling our customers to purchase from price comparison sites for the first time. This has given Veygo access to a brand new audience, while also testing out our new architecture.

Full Stack Engineer

July 2021 - June 2025

I worked on multiple cross-functional teams and projects, from delivering new insurance products to building scalable backend services and APIs.

Taken the lead on several projects, including redesigns of key customer journeys, which have led to improved conversion and UX. And our move to a BFF architecture, gaining experience in Node and developing our initial infrastructure and APIs, which has set a new standard for front-end development at Veygo.

Mentoring has also been an important part of my role, both ad hoc within teams and more formally through regular catch-ups and sessions. And I've also worked on engineering-wide initiatives, helping set engineering principles and establishing conventions for all aspects of development at Veygo, from testing to pull requests.

Junior Full Stack Engineer

July 2019 - June 2021

I started my professional journey joining an amazing team of engineers, gaining experience with React, Django and AWS as part of an Agile Scrum team.

Tech stack

Languages

Typescript & Python

Frontend

React, Redux, CSS, Tailwind, RTL & Cypress

Backend

Node.js, Django, Flask & GraphQL

Infra

AWS, Terraform, Serverless Framework & CI/CD

Education

Loughborough Uni

Sep 2016- Jul 2019

Computer Science - 2.1

Certs

AWS Cloud Practitioner
