Hey! 👋 I build full-stack apps. I'm always learning, enjoy solving tricky problems and have a thing for great user-centric design and experiences.

Experience

Our Future Health

Full Stack Engineer

March 2026 - Now

Veygo by Admiral

Senior Full Stack Engineer

July 2025 - March 2026

I led the rebuild of our quote-to-buy web journey, which solved key business problems and revolutionised how we serve our customers. As part of this, I introduced new technologies and architectures, such as a new design system and GraphQL to increase flexibility and dramatically speed up experimentation through A/B testing. All of which has led to significant improvements to conversion (to purchase), observability and performance.

Mentoring and coaching were an important part of my role, both ad hoc within teams and more formally during onboarding and through regular catch-ups. I also worked on engineering-wide initiatives, helping set engineering principles and establishing conventions for all aspects of development at Veygo, from testing to pull requests.

Full Stack Engineer

July 2019 - June 2025

I started my professional journey here, joining an amazing team of engineers. Gaining experience with React, React Native, Django and AWS as part of an Agile Scrum team. I worked on multiple cross-functional teams, from delivering new insurance products to building scalable backend services and APIs in a move to a serverless (microservice) architecture.

Taken the lead on several projects, including redesigns of key customer journeys, which have led to improved conversion and UX. And delivering a brand-new telematics product, building the end-to-end web journeys and the backend systems that support customers on a new subscription-based offering.

Tech stack

Languages

Typescript & Python

Frontend

React (Next, React Router & React Native), CSS, Tailwind, Redux, RTL & Cypress

Backend

Node.js, Django, Fast API, GraphQL & Temporal

Infra

AWS, Terraform, Serverless Framework & CI/CD

Education

Loughborough Uni

Sep 2016- Jul 2019

Computer Science - 2.1

Certs

AWS Cloud Practitioner
